

CLAY COUNTY FIRE RESCUE MEMORANDUM 07-87

SUBJECT: New Radio Designations

ISSUE DATE: 05/29/07 RESCIND DATE: 5/29/08

Page 1 of 1

As we move toward a NIMS compliance status, we have developed a new radio designation list for personnel and apparatus. These new radio designations shall be effective at 0800 hours on Monday June 4, 2007.

In summary, all rescue numbers are now in concert with the station they are assigned to. All Tankers are now referred to as Tenders and we maintained the three digit designator for amount of water being delivered.. Three digit designators for brush and woods units were removed where appropriate and given a simple station designation. Where there were multiple like resources in a station, the three digit identifier was retained. Number plates for rescues have been ordered and will be delivered upon receipt. Leon Heimbach will coordinate changing any numbers that have been applied to windows, etc.

As for staff, we have assigned function areas and assigned common titles and numbering for each group. We have also assigned designators for each seat on the apparatus as well. This is to assist as we get closer apparatus and seat assignments during incidents. The officer will always retain the title of the assigned unit, i.e., Engine 14 or Rescue 10. The apparatus Engineer will have an Alpha designation (Engine 14 Alpha), the Firefighter riding behind the officer or a Firefighter assigned to a rescue a Bravo designation (Rescue 15 Bravo), and the Firefighter riding behind the Engineer will have a Charlie designation (Engine 17 Charlie).

Please review the attached radio scheme and as always should you have any questions, please contact the appropriate officer in your chain of command for clarification.

Thank you.

prepared/submitted by: Francis J. Ennist, Fire Chief	approval: Francis J. Ennist, Fire Chief
